8 10864411 2015 HONDA CR-V Engine & Engine Cooling THIS CAR VIBRATES AT LOW IDLE. THE VIBRATION BEGINS TO GET WORSE AS THE CAR WARMS UP. STOPPING AT LIGHTS WHILE DRIVING THROUGH TOWN IS EMBARRASSING, ESPECIALLY WHEN I HAVE OTHER PEOPLE IN THE CAR WITH ME. 8 10861560 2015 HONDA CR-V Engine & Engine Cooling I PURCHASED THIS 2015 HONDA CR-V BRAND NEW. I HAVE TAKEN IT TO THE DEALER WHO STATED THEY HAVE HEARD OF THIS PROBLEM BUT NO BULLETIN HAS BEEN FORMALLY ISSUED YET. THE PROBLEM CONSISTS OF TWO THINGS BUT BOTH ARE ENGINE RELATED. WHEN AT A STOP AFTER ABOUT 5-10 SECONDS THE ENGINE GETS A ROUGH IDLE ALMOST LIKE YOU THINK AT FIRST IT'S GOING TO DIE, BUT IT DOESN'T IT'S JUST ANNOYING. HOWEVER, HERE IS A REAL PROBLEM. WHEN DRIVING DOWN THE ROAD, OR AFTER PULLING OUT, CHANGING LANES (REALLY NO SET PATTERN) THE ENGINE (AND ACCELERATION) ARE GONE. IT'S LIKE YOU JUST ARE WITHOUT GO POWER.

NHTSA Consumer Complaints as of July 21, 2016

FINALLY IT CATCHES UP BUT IF YOU HAVE THIS HAPPEN AT THE WRONG TIME IT COULD BE BAD. I HAVE CHANGED LANES AND HAD PLENTY OF SPACE BUT IF YOUR CR-V HAPPENS TO DO THIS IN THE PROCESS THE CLOSING RATE IS MAJOR. THE CAR BEHIND YOU IS ON YOUR BUMPER AND FAST BECAUSE IT'S LIKE YOU JUST STOP ACCELERATING. THIS HAS HAPPENED ON NORMAL STREETS, PULLING AWAY FROM STOP SIGN AND GOING DOWN THE INTERSTATE. NEEDLESS TO SAY IT'S REALLY BAD IF IT HAPPENS AT THE WRONG PLACE AND AT THE WRONG TIME. I HAVE CONTACTED THE DEALER AGAIN. AND, AGAIN I AM TOLD WE DO NOT SHOW ANYTHING (BULLETIN/ RECALL) ON IT TO HAVE A FIX/REPAIR IN PLACE. I BELIEVE HONDA NEEDS TO RECOGNIZE THE ISSUE AND FIND A FIX. BEING THE DEALER HAS HEARD THIS COMPLAINT BEFORE AT LEAST I KNOW I'M NOT ALONE. THIS IS NOT A PROBLEM TO BE DISMISSED BECAUSE A MAJOR WRECK COULD BE THE OUTCOME IF IT CONTINUES. AS FOR WHEN IT'S HAPPENED?? IT'S HAPPENED MANY TIMES BUT SO FAR I'VE BEEN FORTUNATE TO NOT TO GET HIT WHEN MY CAR JUST DECIDES TO GO INTO THIS SERIOUS "SLEEP" MODE. NOTE BELOW I HAVE CHECKED THE LAST DATE OF THE OCCURRENCE BUT NOT TO BE CONFUSED OR TAKEN AS IT'S THE ONLY TIME IT'S OCCURRED. FORT SMITH AR Failure Date: 04/22/2016

8 10862404 2015 HONDA CR-V Engine & Engine Cooling ON A NUMBER OCCASIONS, I MADE A SUDDEN SHARP TURN, & THE ENGINE STALLED FOR A FEW SECONDS, THIS LOSS OF POWER NEARLY CAUSED ME TO EITHER GET HIT IN THE REAR, OR BEING STRUCK BY AN ON COMING VEHICLE. DEALERS SAID THEY'VE HEARD THIS COMPLAINT A NUMBER OF TIMES, BUT THET DON'T HAVE A SOLUTION AS HONDA HAS NOT PUT OUT A SERVICE BULLETIN. THESE CRV'S SEEM TO HAVE THIS AND VIBRATION PROBLEMS, BUT EITHER HONDA DENIES IT, OR HAS NO SOLUTION. A CAR STALLING WHEN MAKING A TURN IS DANGEROUS. BOCA RATON FL Failure Date: 04/01/2016

8 10822190 2015 HONDA CR-V Engine & Engine Cooling MY WIFE AND I PURCHASED THE 2015 CR-V EX-L AWD ON JANUARY 5 2016 AT STATEN ISLAND HONDA. AFTER ONLY 11 DAYS AND 300 MILES ON VEHICLE AS WE WERE DRIVING FOR A SKI VACATION I NOTICED A CRACKLING NOISE WHEN I WOULD TURN THE STEERING WHEEL IN EITHER DIRECTION. I THEN NOTICED THAT NONE OF THE STEERING WHEEL CONTROLS WORKED OR THE RADIO. IN ADDITION TO THIS MY HORN DIDNT WORK AND MY BLUETOOTH WOULD CONSTANTLY SAY (HTC IS OK ) BOTH MY RADIO INTERFACE SCREENS WOULD

ALWAYS FLASH DIFFERENT MAINTENANCE MALFUNCTIONS. MY CELLPHONE WOULD ALSO RANDOMLY CONNECT AND MAKE CALLS. THEN AS I WAS DRIVING TO GET GAS OFF THE NJ TURNPIKE MY HORN STARTED TO GO OFF NON STOP AND I HAD TO PULL THE HORN FUSE OUT FROM UNDER THE HOOD. I ALSO NOTICED A VERY STRONG VIBRATION WHEN VEHICLE IS IDLE AND STOPPED AT TRAFFIC LIGHTS ON BOTH DRIVER AND PASSENGER SIDE AND NOW SEEMS TO BE GETTING WORSE . OUR VEHICLE WAS SERVICED FROM JANUARY 19-21 AND THE MECHANIC STATED THAT THEY REPLACED THE FUSES AND THE CABLE REEL AND SAID THE VIBRATION WAS NORMAL. I DID SOME FURTHER RESEARCH AND THERE IS A LAWSUIT AGAINST HONDA IN REGARDS TO THE 2015 CR-V VIBRATION ISSUE. I DO NOT FEEL SAFE DRIVING THIS VEHICLE AND FEEL THAT I WAS SOLD A \$30K LEMON . I HAVE OWNED HONDAS IN THE PAST WITH NO ISSUES BUT AFTER THIS EXPERIENCE AND HONDA BEING AWARE OF THIS ISSUE AND STILL SOLD THESE TRUCKS THE COMPANY HAS LOST MY TRUST. WHEN GOING THROUGH MY DOCUMENTS I NOTICED THAT I WAS MISSING ALOT OF PAPERWORK FROM MY SALES CONTRACT AND I BROUGHT IT TO THE ATTENTION OF THE SALES REPRESENTATIVE. AT FIRST HE SAID HE GAVE US EVERYTHING AND THEN REALIZED HE DIDNT BUT DIDNT HAVE ACCESS TO THE FILE ROOM TO GIVE US THE NECESSARY DOCUMENTS. HE STATED HE WOULD GET BACK TO US AND NEVER DID. SO IN ALL I WOULD NOT RECOMMEND GOING TO STATEN ISLAND HONDA DUE TO THEIR INCOMPETENT SALES STAFF AND I HOPE HONDA RESOLVES ALL OF THESE ISSUES. STATEN ISLAND NY Failure Date: 01/16/2016

8 10818610 2015 HONDA CR-V Engine & Engine Cooling BOUGHT A HONDA CRV-LX 2015 TWO MONTHS AGO ONLY TO HAVE A VIBRATION PROBLEM AFTER THREE WEEKS. HONDAS FIX WAS TO PUT NEW HEAD REST WITH SHORTER POST AND BUSHINGS UNDER RADIATOR, REAR TAIL GATE , TRANSMISSION AND ENGINE SO AS TO MASK VIBRATION PROBLEM. AFTER DOING THIS THE STEERING BECAME HARD NOT LIKE IT WAS WHEN WE FIRST GOT THE VEHICLE, THE STEERING GOES FROM VERY EASY TO ALMOST MANUAL I CONSIDER THIS A SAFETY PROBLEM. UNFORTUNATELY HONDA OF AMERICA WILL NOT ACKNOWLEDGE THAT IT WAS A DESIGN FLAW AND THE CAR SHOULD NOT BE SOLD. ABOUT 500 MILES I NOTICED I VIBRATION WHILE MY HONDA CR-V IS IDLING. I HAVE TAKEN IT BACK TO THE DEALER WHO HAS DONE NOTHING YO RESOLVE THIS ISSUE. I HAVE ALSO CALLED HONDA HEADQUARTERS WHO HAVE ALSO NOT OFFERED ME A SOLUTION TO THIS ISSUE. IT VIBRATES REAL HARD WHEN I STOP , IT'S IDLING OR WHEN I'M IN REVERSE. IT ALSO TENDS TO WANT TO SHUT OFF . THIS IS A MAJOR ISSUE FOR ME THAT CREATES A SAFETY ISSUE. FOR A BRAND NEW CAR THIS SHOULD BE OCCURRING . I'M AFRAID TO DRIVE IT . I WOULD REALLY APPRECIATE SOME HELP IN GETTING SOME SOLUTION AS HONDA AND THE DEALER IS NOT HELPING ME. I FEEL VERY STUCK DRIVING A CAR THAT HAS A DEFECT. CITY (NEAR BALTIMORE). WE HAD ADDED AN ACCESSORY OF A REMOTE STARTER. THE DEALER INSTALLED THE REMOTE STARTER BUT IT IS NOT WORKING (CAR HAS TO BE TWICE STARTED AND RESTARTED). DEALER HAS TOLD US THAT THIS IS A KNOWN PROBLEMATIC ISSUE WITH ALL CRVS WITH KEYLESS ENTRY. WE WERE NEVER TOLD ABOUT THIS PROBLEM WHILE BUYING THE CAR. WE CONSIDER THIS AS FRAUDULENT PRACTICE. I AM REQUESTING DOT TO PLEASE HELP US ASK HONDA TO RESOLVE THIS ISSUE. EITHER THE REMOTE STARTER SHOULD BE REINSTALLED OR ANOTHER STARTER SHOULD BE INSTALLED WHICH WORKS CORRECTLY. PLEASE NOTE THAT IF THIS IS A KNOWN ERROR (AS DEALER SAID) THEN ALL HONDA CRVS SHOULD BE RECALLED. RESTARTING THE CAR TWICE OR MORE DAMAGES THE CAR AND COULD LEAD TO SAFETY ISSUES IF CAR STARTER STOPS WORKING SOONER THAN EXPECTED. WE RELY ALL OUR CAR FOR ALL PERSONAL, FAMILY AND BUSINESS NEEDS. WELL IT GOT WORSE, SO I TOOK IT BACK AND THE VIBRATION AND RUMBLE WAS DUPLICATED BUT HONDA DOESN'T HAVE A FIX. ROUGH IDLES AT STOPS AND LOW SPEEDS CAN CAUSE A STRAIN ON THE ENGINE AND EVENTUALLY ENGINE FAILURE. 8 10786879 2015 HONDA CR-V Engine & Engine Cooling I BOUGHT A BRAND NEW CR-V EX-L BASED ON EXCELLENT REVIEWS FROM CONSUMER REPORTS AND EDMUNDS. I EXPECTED THE CAR TO BE PERFECT. HOWEVER, HONDA SOLD ME THE DEFECTED CAR WITHOUT ANY NOTICE EVEN THIS DEFECT WAS KNOWN FOR MONTHS. THE ISSUE IS A VIBRATION DURING IDLE. FOR EXAMPLE, WHEN I STOP ON THE TRAFFIC LIGHT, THE PASSENGER SEAT STARTS TO SHAKE. IF I RELEASE BREAKS VIBRATIONS WILL GO AWAY. IT IS NOT NORMAL. I NOTICED THIS PROBLEM 2 MONTHS AFTER THE PURCHASE (OR 600-700 MILES). THEN I WENT TO THE DEALER AND HE TOLD ME THAT HONDA'S ENGINEERS WERE "WORKING ON IT", NO SOLUTION WAS FOUND YET AND I HAD TO WAIT FOR A FURTHER NOTICE. VISIBLE VIBRATIONS MEAN THAT THERE IS MECHANICAL RESONANCE IN THE CAR. AN EXAMPLE OF DESTRUCTION DUE TO MECHANICAL RESONANCE WOULD BE A COLLAPSE OF TACOMA NARROWS BRIDGE. THUS, MY SAFETY CONCERN IS THAT THE CAR CAN BE DAMAGED STRUCTURALLY. FOR EXAMPLE, FEW BOLTS MAY COME LOOSE AND THE CAR MAY DISINTEGRATE DURING THE DRIVE. THE PROBLEM COULD BE THAT A NEWLY INTRODUCED CVT TRANS MISSION IN HONDA CR-V 2015 DOESN'T GO ALONG WITH THE ENGINE AND THEY PRODUCE EXCESSIVE VIBRATIONS THAT SPREAD THRU A CAR FRAME TO THE SEAT. PROBABLY, THE CAR WASN'T TESTED PROPERLY DURING DESIGN PROCESS. THUS, HONDA ENGINEERS OVERLOOKED THIS PROBLEM. I HAVE A VIDEO FILE OF VIBRATIONS BUT IT'S TOO BIG FOR UPLOAD. ANYWAY, YOU CAN SEE THIS ISSUE HERE: [HTTPS://WWW.YOUTUBE.COM/WATCH?V=SR-YQAJRRB8](https://www.youtube.com/watch?v=SR-YQAJRRB8)

ANY NEW PASSENGER IN MY VEHICLE IS STARTLED BY THE VIBRATIONS. EVERY NEW PASSENGER COMMENTS ABOUT THE STARTLING VIBRATIONS. SOME PASSENGERS EVEN SCREAM DUE TO THE STARTLING VIBRATIONS. 8 10694008 2015 HONDA CR-V Engine & Engine Cooling MY BRAND NEW 2015 HONDA CR-V IS EXPERIENCING STRONG VIBRATIONS IN IDLE WHEN IN DRIVE. I CAN FEEL THE VIBRATIONS IN MY SEAT AS I AM IN IDLE, BUT IT IS MOST NOTICEABLE WHEN THE PASSENGER SEAT IS EMPTY AS IT SHAKES AGGRESSIVELY FROM THE VIBRATIONS. IT'S ANNOYING AND ITS DISTRACTING WHEN DRIVING. THERE ARE MANY COMPLAINTS ON THE INTERNET ON THIS ISSUE BUT HONDA IS CALLING IT A "CHARACTERISTIC" OF THE CAR. I'VE CALLED THE DEALERSHIP TWICE NOW BUT THEY HAVE NO FIX SO THEY ARE BASICALLY TELLING ME I AM OUT OF LUCK AT THIS TIME AND TO WAIT IT OUT. I'VE ALSO MADE A PHONE CALL TO HONDA AMERICA AND AWAITING A CALL BACK ON MY CASE. A BRAND NEW CAR WITH THIS PRICE TAG SHOULD NOT HAVE VIBRATIONS WHEN IN IDLE. 8 10681383 2015 HONDA CR-V Engine & Engine Cooling HELLO, I  
BOUGHT 2015 HONDA CR-V LX ON 12/30/2014, AND ON THE NEXT DAY, I NOTED  
THE WHOLE CAR VIBRATES WHENEVER IDLING IN DRIVE, AT 600 RPM. THIS  
HAPPENS EVERY TIME I STOP AT THE RED LIGHTS. SO, ON 1/12/2015, I TOOK IT  
TO HONDA CARS OF MCKINNEY, TX, AND THEY SAID THE STRANGE  
EXPLANATION; "WHEN COMPARED TO OTHER MANUFACTURER'S CARS, IT  
DOES VIBRATE MORE. BUT, WHEN COMPARED TO OTHER 2015 CR-VS, THEY  
ALL VIBRATE. SO, THIS IS WHY IT IS NOT THE PROBLEM IN 2015 CR-VS."  
WHEN I SEARCHED ONLINE, THE VIBRATION PROBLEM ON 2015 HONDA CR-VS  
IS ACROSS THE US, NOT JUST IN TEXAS. EVERYONE HAS THE SAME EXACT  
ISSUE, AND THEIR HONDA SERVICE DEPTS SAY THE SAME COMMENT; "YOU  
ARE THE FIRST ONE TO REPORT THE PROBLEM. NO ONE ELSE HAS  
COMPLAINED. THERE IS NO PROBLEM ON THE NEW 2015 CR-VS."  
CURRENTLY, MY CR-V IS AT 1000 MILES, AND THE CAR STILL KEEPS VIBRATING  
AT EVERY RED LIGHTS OR IN TRAFFIC. MY FAMILY SUFFERS FROM  
HEADACHES AND NAUSEA BECAUSE OF THE VIBRATION. 2015 CR-V IS  
DEFINITELY NOT THE SAFE CAR. ADDITIONALLY, I BELIEVE THIS IS ALSO THE  
CLASSIC EXAMPLE OF DECEPTIVE BUSINESS PRACTICE, AND THIS NEEDS TO  
BE CORRECTED PROMPTLY BECAUSE THERE WOULD BE MORE VICTIMS.  
PLEASE HELP US AND HAVE HONDA FIX THIS VIBRATION PROBLEM ON 2015 CR-

8 10717503 2015 HONDA CR-V Engine & Engine Cooling WHEN THE VEHICLE IS STOPPED AT IDLE WITH THE BRAKE PEDAL ENGAGED A SERIOUS VIBRATION DEVELOPS. AS THE VEHICLE SETS THE VIBRATION INCREASES AND THE RPM'S DROP FROM APPX.. 600 RPM TO BELOW 200P RPM. . WHEN THE RPM'S RECOVER THE VEHICLE PULLS AGAINST THE BREAKS. WHEN I REMOVE MY FOOT FROM THE BREAK PEDAL THE VIBRATION STOPS. YESTERDAY (5/19/2015) WHILE STOPPED, THE VEHICLE VIBRATED VIOLENTLY AND THEN DIESLED AND STALLED WHILE AT A STOP LIGHT. THE FULL STALL WAS A ONE TIME OCCURRENCE HOWEVER THE VEHICLE OFTEN APPROACHES A STALL WHILE STOPPED WITH THE BRAKE . THE VIBRATION HAS BEEN PRESENT SINCE I PURCHASED THE VEHICLE IN NOVEMBER 2014. WHEN I TOOK IT TO GERMAINE HONDA, THE SELLING DEALERSHIP, IN ANN ARBOR, I WAS TOLD THAT THE VIBRATION IS A "CHARACTERISTIC" OF THE VEHICLE. THIS SEEMS LIKE A FLIMSY EXCUSE AND QUITE FRANKLY PROBLEM IS BEGINNING TO WORRY ME. THE STALL WAS SERIOUS AND IN TRAFFIC. THE VIBRATION IS VERY PRONOUNCED AND TRAVELS THROUGHOUT THE CHASSIS. I HAVE READ ON THE HONDA CR-V OWNER FORUM THAT THIS IS A VERY COMMON AND DANGEROUS PROBLEM. IT SEEMS THAT HONDA MOTORS AND THEIR DEALERSHIPS ARE SIMPLY IGNORING THE SITUATION. 8 10671203 2015 HONDA CR-V Engine & Engine Cooling THERE ARE SEVERAL ONGOING PROBLEMS CAUSED BY DEFECTS WITH THIS VEHICLE. THERE IS A VIBRATION WHEN THE CAR IS IN "DRIVE" AND COMPLETELY STOPPED AT AN INTERSECTION. THE RPM'S DROP, SOMETIMES AS LOW AS 550 WHICH CAUSES A VIBRATION AS IF THE VEHICLE IS ABOUT TO STALL. THE LOWER THE RPM'S, THE WORSE THE VIBRATION. ON AT LEAST TWO OCCASIONS I HAVE HAD TO PUT THE CAR IN NEUTRAL AT A STOP LIGHT BECAUSE THE RPMS DROPPED SO LOW. THERE IS ANOTHER VIBRATION OR SHUDDER IN THE TRANSMISSION BETWEEN 1800 AND 2000 RPMS WHEN ACCELERATING. SOMETIMES I SMELL GASOLINE IN MY CAR SHORTLY AFTER IGNITION. SOMETIMES FOLLOWING DECELERATION, THE CVT TRANSMISSION CANNOT CATCH UP, AND WHEN I NEED TO ACCELERATE AGAIN, I PUT THE "PEDAL TO THE METAL;" BUT THE CAR IS BARELY ACCELERATING AND NOT THRUSTING FORWARD LIKE IT SHOULD. THIS OCCURRED ON A HIGHWAY MERGE AT I-83 AND I-695 ON DECEMBER 19, 2014 (A TRICKY AND DANGEROUS MERGE AREA). TWICE SINCE 1/1/15 I HAVE HEARD A FRIGHTENING ENGINE

NOISE WHEN DECELERATING ON A WINDY DOWNHILL ROAD. THE NOISE SOUNDS LIKE A SMALL PLANE IS OVERHEAD, AND I WAS SHOCKED THE CAR WAS STILL RUNNING, AS I WAS LOOKING FOR CHECK ENGINE LIGHTS OR SOME INDICATION WHAT WAS WRONG. IT IS NOT A NORMAL ENGINE NOISE. HONDA IS AWARE OF THE VIBRATIONS WHEN STOPPED AND AT 1800-2000 RPMS AND DOES NOT KNOW IF/WHEN A FIX MAY BE AVAILABLE. I AM NOT THE ONLY OWNER WITH THIS ISSUE - THERE ARE A NUMBER OF COMPLAINTS ON THE VARIOUS REVIEW BOARDS, AND HONDA HAS ACKNOWLEDGED IT IS WIDESPREAD. HONDA WILL NOT PROVIDE THEIR POSITION TO ME IN WRITING WHEN ASKED. THE DEALER HAS BEEN UNABLE TO DUPLICATE THE OTHER PROBLEMS WHICH ARE MORE INTERMITTENT, AND IT WILL BE BACK AT THE DEALER NEXT WEEK TO ADDRESS THE FRIGHTENING ENGINE NOISE AND DOCUMENT THAT PROBLEM. PURCHASED NEW 2015 HONDA CRV ON NOVEMBER 8TH, 2014.  
IMMEDIATELY AFTER PURCHASE, VEHICLE EXHIBITED SEVERE VIBRATION AND SHUDDERING DURING IDLE, WHEN ACCELERATING, AND AT HIGHWAY SPEEDS. AFTER VEHICLE IS WARMED UP IDLE IS VERY LOW , AROUND 550 RPM, AND VEHICLE JUST SHAKES AND PASSENGER SEAT VIBRATES. VIBRATIONS CAN BE FELT THROUGH THE STEERING WHEEL, AND CREATE A DISTRACTION DURING DRIVING. HONDA'S RESPONSE IS THAT THE VEHICLE IS WITHIN PARAMETERS AND THIS IS A CHARACTERISTIC. AN ENGINE OR TRANSMISSION SHOULD NOT SHUDDER OR VIBRATE THIS MUCH DURING DRIVING. HONDA NEEDS TO ACKNOWLEDGE THIS AND IMMEDIATELY CORRECT IT. \*TR

IN A V8 I WAS JUST NOT USED TO IT. I TOOK HIS WORD FOR IT AND HAVE UNFORTUNATELY BECOME ACCUSTOM TO IT BUT IN THE LAST MONTH IT HAS GOTTEN MUCH WORSE. NOW IT IS SHAKING VIOLENTLY ENOUGH TO WHERE IF YOU WERE DRIVING INSTEAD OF IDLING YOU MAY LOSE CONTROL OF THE VEHICLE. THIS HAS ALSO NOT BEEN MY ONLY SAFETY ISSUE WITH THIS VEHICLE. MY OTHER COMPLAINT IS THAT ON CERTAIN ROAD TYPES THE CAR IS EXTREMELY UNSTABLE. THE FIRST TIME I EXPERIENCED THIS ISSUE I ACTUALLY PULLED OVER AND CALLED MY HUSBAND TO LET HIM KNOW WHAT WAS GOING ON. I IMMEDIATELY TOOK IT INTO THE DEALERSHIP AND WAS TOLD THAT IT WAS HAPPENING BECAUSE THE TIRES WERE NEW AND WERE GRABBING THE LINES IN THE ROAD AND THAT IT SHOULDN'T LAST LONG. WELL, HERE IT IS FIVE MONTHS AND 4000 MILES LATER AND IT'S ACTUALLY GETTING WORSE! THE CAR VEERS TO THE RIGHT AND TO THE LEFT UNCONTROLLABLY. MY HUSBAND WAS DRIVING WHEN THERE WAS ICE ON THE ROAD AND IT ACTUALLY PULLED US AND MADE US TEMPORARILY SLIDE ON THE ICE DUE TO IT JERKING AND HE ALMOST LOST CONTROL. THIS IS THE LEAST SAFE I'VE FELT IN ANY CAR THAT I'VE EVER OWNED. I FEAR FOR MY FAMILY'S SAFETY EVERY TIME WE RIDE IN IT AND I AM EXTREMELY DISAPPOINTED IN HOW HONDA HAS HANDLED THE COMPLAINTS.

THIS STARTED AS SOON AS I PURCHASED THE CRV. WHEN I BROUGHT IT BACK TO THE DEALER IN NOVEMBER 2014, WITH ONLY 200 MILES ON IT, I WAS TOLD HONDA WAS AWARE OF THE ISSUE AND WAS WORKING ON A FIX FOR IT. IT HAS BEEN 10 MONTHS WITH MULTIPLE VISITS TO THE DEALER AND STILL NO FIX. I HAVE BEEN TOLD RECENTLY AT THE DEALER THAT HONDA WAS MOST LIKELY NOT GOING TO CORRECT THIS ISSUE BECAUSE OF THE COST. IT CONTINUES TO BE A DISTRACTION WHILE DRIVING AND AT IDLE AND I HOPE HONDA WILL DO THE RIGHT THING AND FIX THIS ISSUE. TO ME THIS IS A MAJOR ISSUE THAT NEEDS CORRECTION NOW. ALSO, I HAVE HAD A NOISE FROM UNDER THE CRV DRIVING OVER DIPS OR BUMPS IN THE ROAD AT LOW SPEEDS, MOST NOTICEABLE BELOW 30 MPH. BROUGHT IT TO THE DEALER WHO HAS SINCE REPLACED TO REAR STRUTS 2 TIMES ALREADY AND STILL THE NOISE IS STILL THERE. I WILL CONTINUE TO BRING IT BACK TO THEM UNTIL THIS IS ADDRESSE D. 8 10683081 2015 HONDA CR-V Engine & Engine Cooling THE CAR VIBRATES HEAVILY AT IDLE. THIS VIBRATION FAR EXCEEDS ANY VIBRATION I HAVE EXPERIENCED IN ANY OTHER VEHICLE AND IS NOT ACCEPTABLE FOR A NEW VEHICLE. ALL PASSENGERS CAN FEEL THE VIBRATION, BUT IT IS MOST PRONOUNCED IN THE FRONT PASSENGER SEAT - WHEN EMPTY IT SHAKES VIOLENTLY. THE VIBRATION IS SO PRONOUNCED THAT I HAVE A HARD TIME FOCUSING MY EYES RESULTING IN EYE-STRAIN. THE CONDITIONS UNDER WHICH THE VIBRATION (DESCRIBED BELOW) OCCURS WILL NOT BE EXPERIENCED BY MOST TEST-DRIVERS AND SO HONDA IS DECEIVING THE PUBLIC BY SELLING THIS CAR. THEY ARE AWARE OF THE ISSUE AND ARE DOING NOTHING TO SOLVE IT AND THEY CONTINUE TO SELL THE CR-V. THIS IS SHAMEFUL. MY FINDINGS: 1. THE STRONG VIBRATION / SHAKING HAPPENS CONTINUOUSLY WHEN: A. ENGINE IS WARM 5-15 MINUTES B. AT A COMPLETE STOP IN DRIVE C. THERE IS NO ADDITIONAL LOAD ON THE ENGINE (ALL ADDITIONAL COMPONENTS ARE OFF - LIGHTS, AC , RADIO ETC) D. RPMS DROP TO JUST ABOVE THE 500 LINE 2. THE STRONG VIBRATION / SHAKING COMES AND GOES CYCLICALLY WHEN: A. ENGINE IS WARM 5-15 MINUTES B. AT A COMPLETE STOP IN DRIVE C. THERE IS SOME ADDITIONAL LOAD ON THE ENGINE. SUCH AS: AC OR MANUALLY TURNED ON RUNNING LIGHTS - HOW LONG IT TAKES TO CYCLE VARIES, BUT IT WILL DO SO EVENTUALLY. THE RPMS CYCLE BETWEEN THE 550-600 (HARD VIBRATION / SHAKING) AND 750-800?? (AGAIN NOT SURE OF THE EXACT READING) WHICH PRODUCES A MUCH MORE TOLERABLE (ALTHOUGH STILL VERY ANNOYING) VIBRATION 3. THE STRONG VIBRATION SHAKING DOES NOT HAPPEN WHEN THERE IS ENOUGH OF A LOAD ON THE ENGINE TO HOLD THE RPMS STEADY AT THE HIGHER IDLE RPM MARK OF APPROXIMATELY 750-800. ALTHOUGH, THE LESS PRONOUNCED (ALTHOUGH STILL VERY ANNOYING) VIBRATION REMAINS. A. MOST CONSISTENT THINGS TO DO THIS: AUTO-LIGHT FUNCTION WHEN ENGAGED WITH LIGHTS ON & MANUALLY TURNING ON FULL NIGHTTIME LIGHTS . \*TRHAWTHORNE
